# 开发unity3d 开发ios游戏上架appstore流流程

- 一.使用工具: unity3d Xcode Mac
- 二. unity3d 项目导到Xcode上的方法/步骤:
- 1.首先,在Mac系统下创建unity工程时,将模式设置为3D模式,或进入项目后在editor->progject Setting->editor->mode改为3D.
- 2.接着的开发流程就按照正常流程走了, 在unity中布置场景, 添加动画效果, 编写控制脚本.
  - 3. 做完以上, 就可以进入发布准备阶段, 接着你还需要这些步骤:
- (1)需要一台mac系统的电脑,然后在mac系统上需要装有xcode,我们将使用这个工具进行ios程序的build和提交。
- (2).在unity中file-builldSetting,先切换到ios平台,然后设置playerSetting相关参数 (亦可使用默认设置),然后按下build或者build&run,然后会让你保存一个xcode项目,如果是build需要手动进入保存xcode项目目录打开xcode项目,如果是build&run会自动加载到Xcode.
- (3). 给这个项目授权 (开发者账号),然后运行
- (4).如果选择已经连接在mac上到设备,则会安装到ios设备上运行,否则就在模拟器运行.

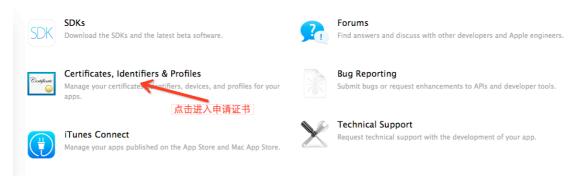

## 三.上架App Store的步骤:

- 1.首先你需要有一个苹果的开发者帐号(个人/公司账号或企业账号),一个Mac系统,如果没有帐号可以在打开https://developer.apple.com/申请加入苹果的开发者计划.支付99美元(个人/公司账号)或者299美金的年费(企业账号),99美金可以上传到AppStore,测试机数量有限制,299美金可以不能上传到AppStore,测试机数量无限制,怎么申请网上有详细的介绍,在此不多做介绍.
- 2.如果你已经有了账号,直接打开<u>https://developer.apple.com/</u> 并登录到苹果MemberCenter,见下:

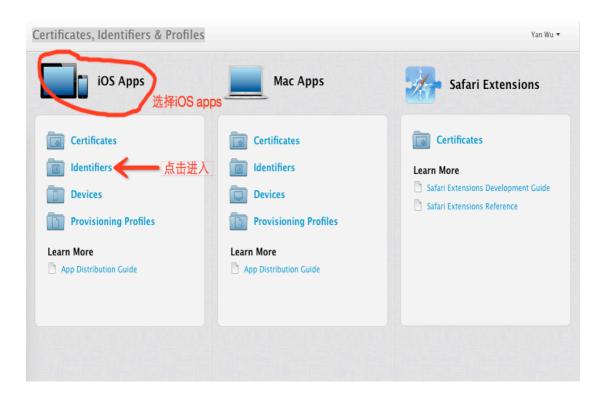

登陆后点击进入 Certificates, Identifiers & Profiles Certificates, Identifiers & Profiles 所有证书相关的都在这里进行,如下图所示:

# 3.申请AppId:

在下图的左边选择 iOSApps->Identifiers进入AppIDs, 我们先创建一个AppId, 对于要发布到Appstore上的程序,都有一个唯一的AppId,下面会列出你当前所有的AppId.

# 点击进入APP IDS 后,点击右上角的+号来添加一个APP ID,如下图:

# Registering an App ID

The App ID string contains two parts separated by a period (.)—an App ID Prefix that is defined as your Team ID by default and an App ID Suffix that is defined as a Bundle ID search string. Each part of an App ID has different and important uses for your app. Learn More

App ID Descript	tion
Name:	输入项目的拼音或者英文名
	You cannot use special characters such as @, &, *, ', "
App ID Prefix	
Value:	JR7KNKY5BQ (Team ID)
App ID Suffix	

### Explicit App ID

If you plan to incorporate app services such as Game Center, In-App Purchase, Data Protection, and iCloud, or want a provisioning profile unique to a single app, you must register an explicit App ID for your app.

To create an explicit App ID, enter a unique string in the Bundle ID field. This string should match the Bundle ID of your app.

Bundle ID: 这个很重要,一定要和项目的Bundle ID 一致

We recommend using a reverse-domain name style string (i.e., com.domainname.appname). It cannot contain an asterisk (\*).

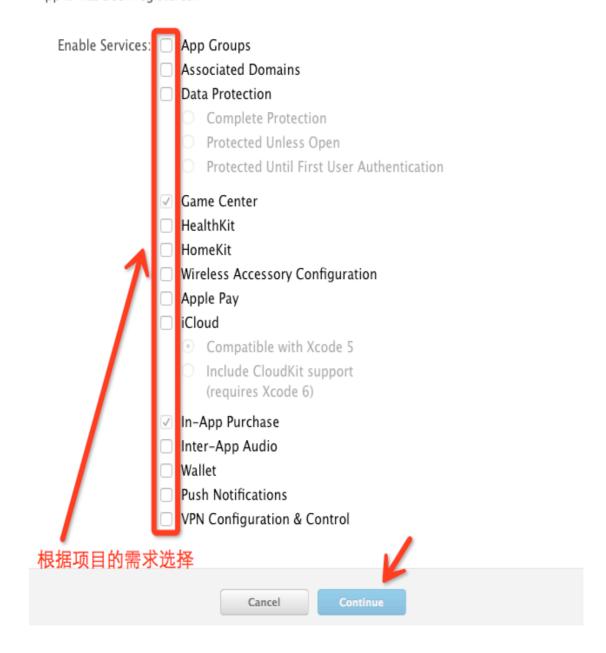

#### Wildcard App ID

This allows you to use a single App ID to match multiple apps. To create a wildcard App ID, enter an asterisk (\*) as the last digit in the Bundle ID field.

Bundle ID:	
	Example: com.domainname.*

# **App Services**

Select the services you would like to enable in your app. You can edit your choices after this App ID has been registered.

# Confirm your App ID.

To complete the registration of this App ID, make sure your App ID information is correct, and click the submit button.

App ID Description: test Identifier: JR7KNKY5BQ.com.tl.www App Groups: 

Disabled Associated Domains: Disabled Data Protection: 

Disabled Game Center: • Enabled HealthKit: Disabled HomeKit: Disabled Wireless Accessory Configuration: 

Disabled iCloud: Disabled In-App Purchase: • Enabled Inter-App Audio: Disabled Apple Pay: Disabled Wallet: Disabled Push Notifications: 

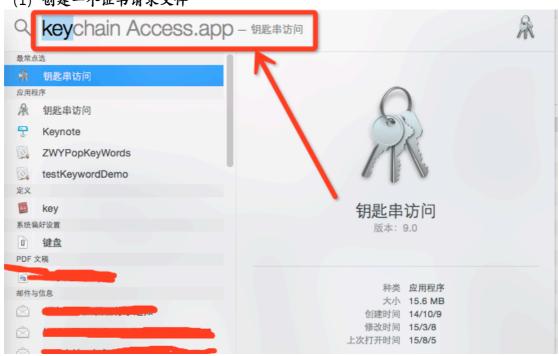

Disabled VPN Configuration & Control: 

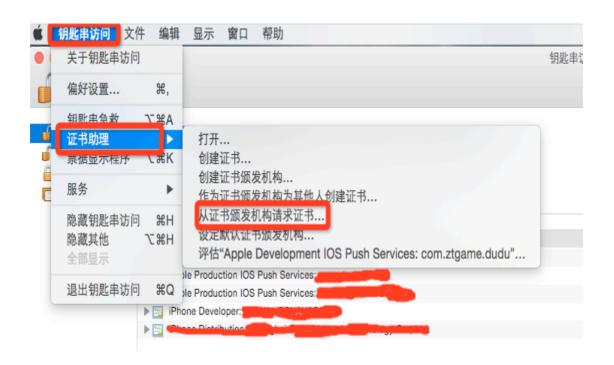

Disabled

## 4.申请发布证书:

(1) 创建一个证书请求文件

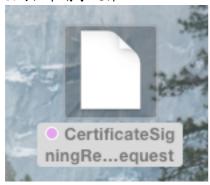

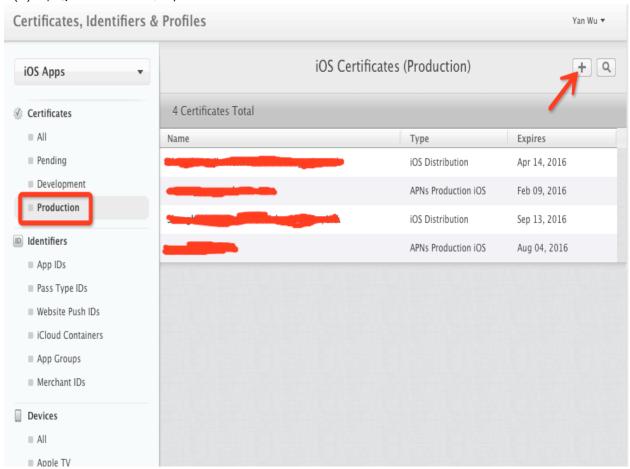

点击存储, 你就可以看到你的桌面多了一个CertificateSigningRequest.certSigningReque st的证书请求文件

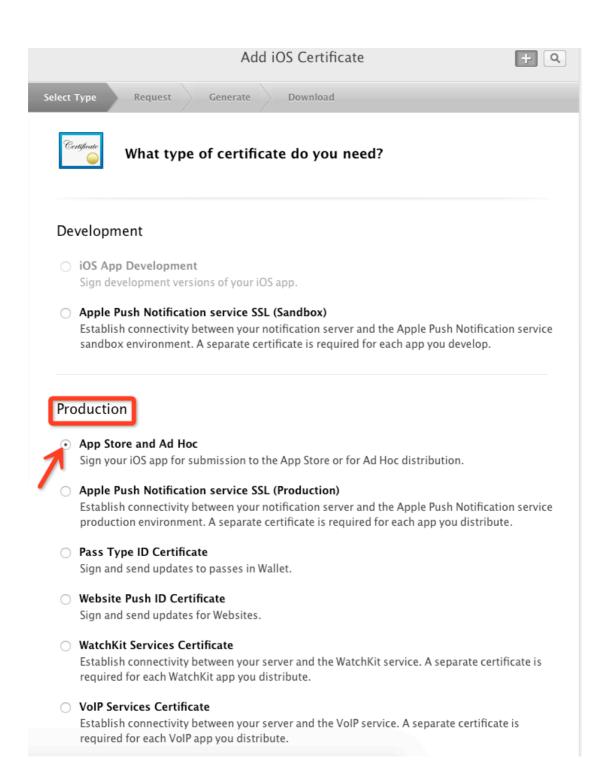

## (2) 申请 Certificates 证书:

点击 + 号后, 直接勾选 App Store and Ad Hoc

如果 App Store and Ad Hoc 是灰色不能选择,那就是之前有创建过但是没有使用的,需要删除之前那个没用过的

# 其它的都不用管,直接 Continue

### About Creating a Certificate Signing Request (CSR)

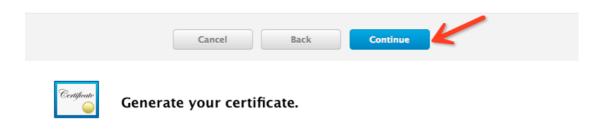

To manually generate a Certificate, you need a Certificate Signing Request (CSR) file from your Mac. To create a CSR file, follow the instructions below to create one using Keychain Access.

#### Create a CSR file.

In the Applications folder on your Mac, open the Utilities folder and launch Keychain Access.

Within the Keychain Access drop down menu, select Keychain Access > Certificate Assistant > Request a Certificate from a Certificate Authority.

- In the Certificate Information window, enter the following information:
  - In the User Email Address field, enter your email address.
  - In the Common Name field, create a name for your private key (e.g., John Doe Dev Key).
  - The CA Email Address field should be left empty.
  - In the "Request is" group, select the "Saved to disk" option.
- Click Continue within Keychain Access to complete the CSR generating process.

When your CSR file is created, a public and private key pair is automatically generated. Your private key is stored on your computer. On a Mac, it is stored in the login Keychain by default and can be viewed in the Keychain Access app under the "Keys" category. Your requested certificate is the public half of your key pair.

#### Upload CSR file.

Select .certSigningRequest file saved on your Mac.

# Your certificate is ready.

#### Download, Install and Backup

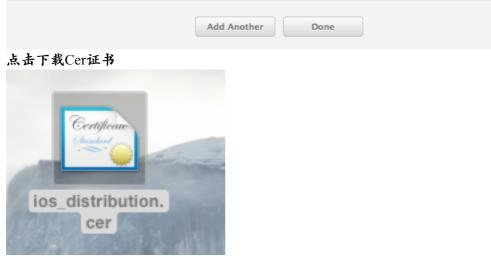

Download your certificate to your Mac, then double click the .cer file to install in Keychain Access. Make sure to save a backup copy of your private and public keys somewhere secure.

#### Documentation

For more information on using and managing your certificates read:

App Distribution Guide

# (3).生成provisioning配置文件

在下图左边选择provisioning, profiles选项下的distribution,来生成一个发布的准备描述文件:

#### 然后点击右边的+

## What type of provisioning profile do you need?

## Development

iOS App Development

Create a provisioning profile to install development apps on test devices.

tvOS App Development

Create a provisioning profile to install development apps on tvOS test devices.

# Distribution

#### App Store

Create a distribution provisioning profile to submit your app to the App Store.

Apple TV App Store

Create a distribution provisioning profile to submit your tvOS app to the App Store.

Ad Hoc

Create a distribution provisioning profile to install your app on a limited number of registered devices.

tvOS Ad Hoc

Create a distribution provisioning profile to install your app on a limited number of registered tvOS devices.

#### 然后如下图, 选择我们前面创建的AppID, 点击Continue:

## Select App ID.

If you plan to use services such as Game Center, In-App Purchase, and Push Notifications or want a Bundle ID unique to a single app, use an explicit App ID. If you want to create or provisioning profile for multiple apps or don't need a specific Bundle ID, select a wildcard App ID. Wildcard App IDs use an asterisk (\*) as the last digit in the Bundle ID field. Please note that iOS App IDs and Mac App IDs cannot be used interchangeably.

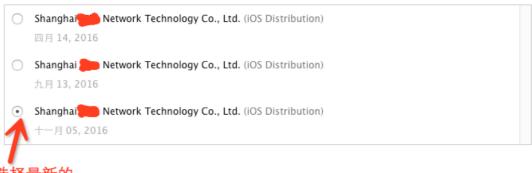

App ID: test (JR7KNKY5BQ.com.tl.www) 前面创建的App ID

#### Select certificates.

Select the certificates you wish to include in this provisioning profile. To use this profile to install an app, the certificate the app was signed with must be included.

选择最新的

点击 Continue 后, 在新的页面中填写 Profile name, 这个随便填, 下面的App ID,检查确认是我们之前创建的 appid, 这个必须一致°确认后提交:

## Name this profile and generate.

The name you provide w	ill be used to identify the profile in the portal.
Profile Name:	名字可以随便写
Type:	iOS Distribution
App ID:	test(JR7KNKY5BQ.com.tl.www)
Certificates:	1 Included 检查确认是我们之前创建的 appid,这个必须一致,确认后提交
	Cancel Back Generate

# Your provisioning profile is ready.

#### Download and Install

Download and double click the following file to install your Provisioning Profile.

### Documentation

For more information on using and managing your Provisioning Profile read:

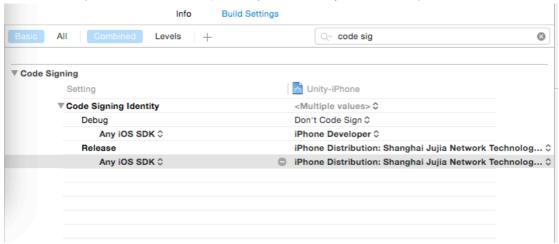

App Distribution Guide

Add Another	Done

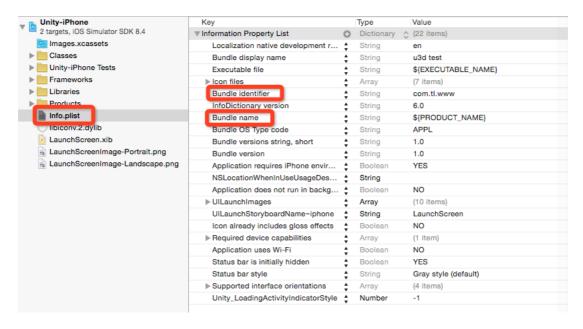

点击download下来,现在,我们的证书的准备工作就做完了,我们有了一个appid,一个distribution.cer证书文件,一个provisioning文件。(app中如果有推送服务,还需要推送证书,来实现app的推送功能)。

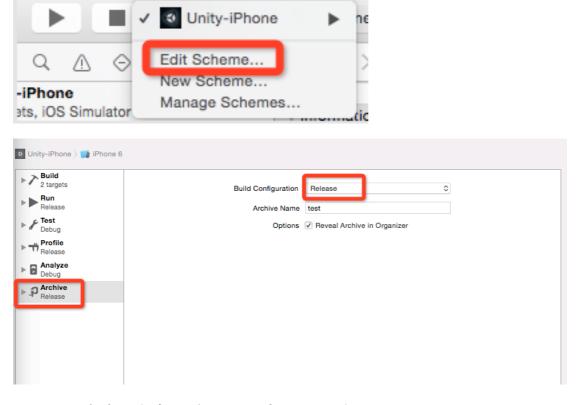

- (4) 证书和配置文件以及bundleid就创建好了, 剩下在本地项目中做出相应设置
- a.设置BuildSettings,见下图:Debug对应的是开发证书和开发的配置文件, release 对应的是发布证书和发布配置文件, development对应的是测试环境, production 对应的是生产环境.根据实际情况选择对应的证书和配置文件.

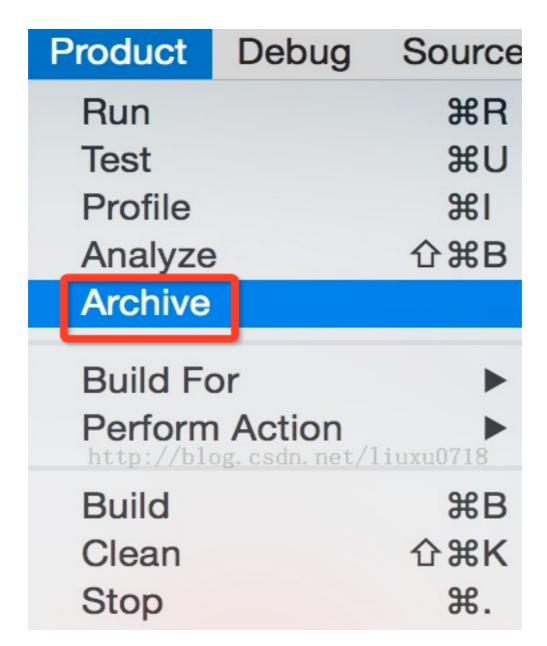

b. 修改bundle ID (与之前在developer上创建的bundle ID保持一致) 和bundle name (app的名字)

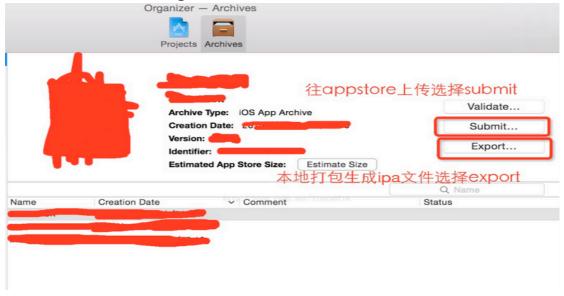

c. 修改scheme (修改为release版本) 和 运行设备 (修改为 iOS Device 形态),见下图

d..archive打包,根据需求 (上传或测试) 选择证书 定置文件和sche me,见下图

# Xcode会自动弹到Organizer界面:

选择submit后会弹出一个选择账户的提示框,选择相应的开发者账户就 好,如遇到下图问题,建议重新下载带密钥的证书,或者重新创建证书

# Your account already has a valid iOS Distribution certificate

If you have your signing identity on another Mac, you can import a developer profile. You can also revoke the current certificate and request one again.

选择Export后, 再选择第二个 save for ad hoc deployment, 生成本地ipa文件包用于测试, next 倒出到本地即可

ect a method for expo	16
Save for iOS App Sign and package a	o Store Deployment application for distribution in the iOS App Store.
Save for Ad Hoc Sign and package a	Deployment application for Ad Hoc distribution outside the iOS App Store.
Save for Enterpri	ise Deployment application for enterprise distribution outside the iOS App Store.
	http://blog.csdp.net/liuxu0718

三.Ipa包提交苹果app store

1.在iTunes 中创建程序:

打开https://itunesconnect.apple.com/

Apple ID

输入账号和密码

密码

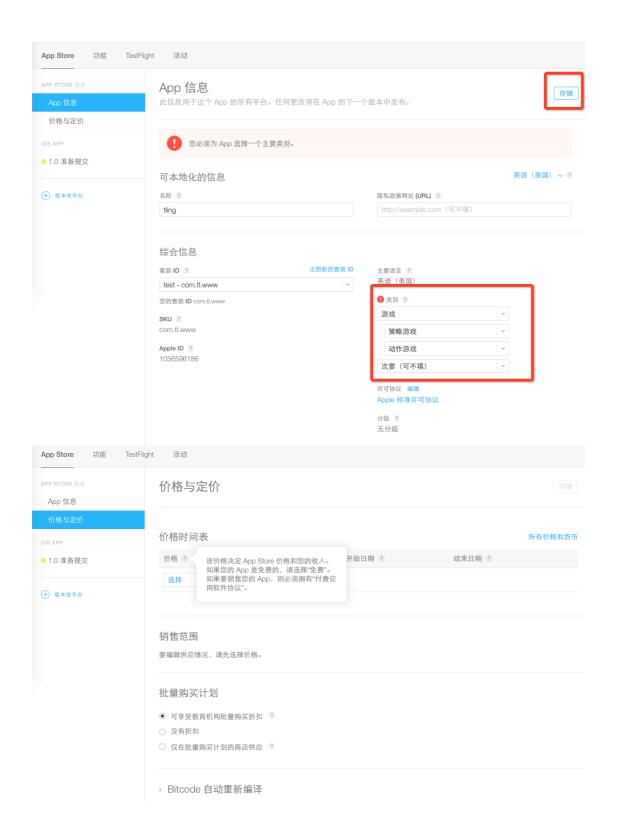

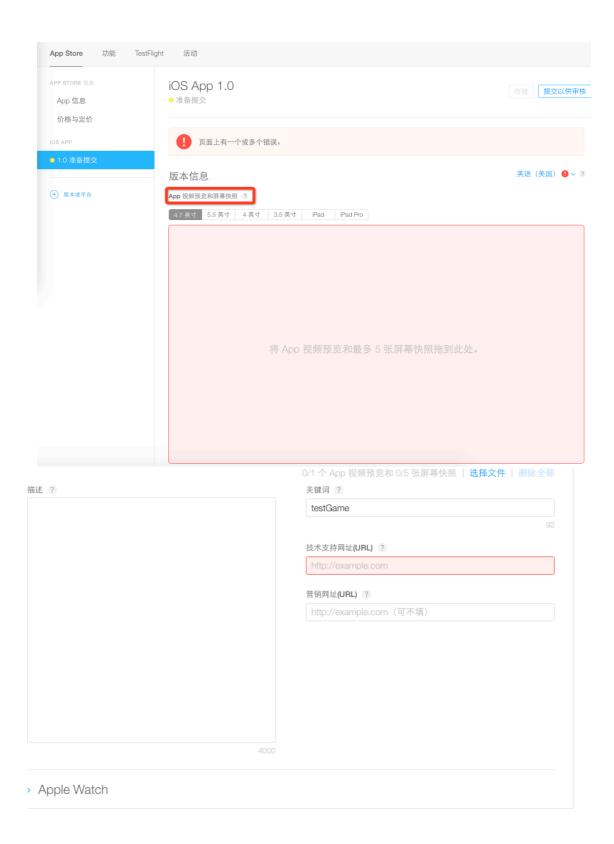

取消

创建

#### 构建版本 🛚

使用 Xcode 5.1.1 或更高版本,或使用 Application Loader 3.0 或更高版本提交您的构建版本。

		ne in .			
App 图标 ?		版权?			
选择文件		商务代表联系信息 ?  在韩国 App Store 中显示的商务代表联系信息。  Shanghai Jujia Network Technology Co., Ltd.			
		姓氏	名字

	密码				

#### 版本发布 🕕

在您的 App 获得批准后,我们可以立即为您发布它。如果您要自己发布该 App,请选择一个日期或者在批准后的任何时刻手动发布它。当您的 App 处于"等待开发者发布"状态,您可以公布促销代码、继续 TestFlight Beta 版测试,或者拒绝发布并提交一个新的构建版本。无论您选择哪个选项,我们必须先处理您的 App,然后才能在 App Store 上提供它。当您的 App 处于"正在为 App Store 进行处理"状态,您无法获取新的促销代码、邀请新的测试员或拒绝您的 App。

- 手动发布此版本
- 自动发布此版本
- 在 App 审核后自动发布此版本,时间不早于 ?

您的本地日期和时间。

Movember 6, 2015 2:00 AM

# 2.上传程序

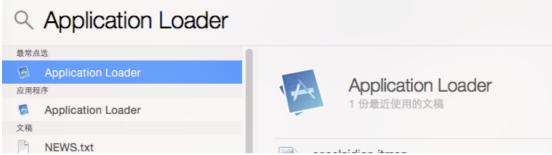

上传程序请在你的mac系统下找到application uploader工具, Xcode4开始将该工具集成到了xcode里面。

构建版本 🕕

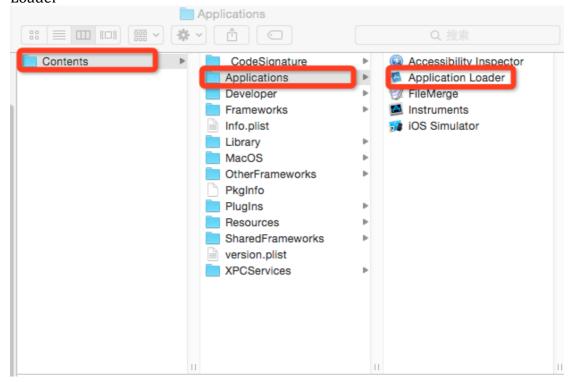

使用 Xcode 5.1.1 或更高版本,或使用 Application Loader 3.0 或更高版本提交您的构建版本。

打开 Application Loader 的方法有两种:

(1) 在Mac系统中可以直接在Mac下搜索,如下图:

(2) 在应用程序中右键点击 Xcode, 再选择显示包内容, 最终找到Application Loader

双击Application Loader打开下图:

选择"交付您的应用程序"双击或者点击右下角的"选取",选择电脑中已经用证书生成的ipa文件,然后按照步骤上传ipa文件

点击完成即可!
